

SupplyFrame Releases New Electronic Components Sourcing Tool to Speed Price and Information Gathering with Any Electronic Part Supplier

Easy electronic components sourcing system opens access to information and pricing about electronic components.

Pasadena, CA ([PRWeb](http://prweb.com)) October 27, 2006 -- SupplyFrame (<http://supplyframe.com/>), a leading search engine for electronic components, announces its new online, interactive quoting tool designed to facilitate the gathering, analyzing and decision making on electronic components and sources. This industry preferred system allows buyers and engineers to specify and analyze parts and electronic components sourcing options with up-to-the-minute information from suppliers all over the world.

SupplyFrame's Electronic components sourcing tool allows users to easily manage parts lists, retrieve price, lead times and find alternative parts. By automatically assigning line items and distributing them electronically, SupplyFrame helps users skip the grunt work and reveal the unassigned and unquoted parts that need attention. Furthermore, the status of all quotes is tracked, keeping users up-to-date with a single dashboard. SupplyFrame also facilitates custom and canned analytics, aiding users in finding the right components and sources.

While using the SupplyFrame interactive tool, an electronic part supplier and buyer in any location are able to interact easily through instant message and e-mail. Conveniently, SupplyFrame automatically converts currencies, time zones and languages for complete internationalization. The SupplyFrame electronic components sourcing tool is online, not software, so no installation is required. The easy-to-use system increases business efficiency and requires no training, speeding results and controlling head count.

"SupplyFrame allows us to quote much faster, and actually quote a greater number of suppliers per BOM," says John DiBiase, director of materials and planning for Test Technology Inc. "We were able to reduce the cost of our board 17%. I can't tell you how big that was for our company."

Since SupplyFrame is a neutral, third-party organization, it is able to offer its system to the electronic part supplier and buyer at no cost. The SupplyFrame online tool is funded by vendors of components who use it deliver product information and updates.

Reduce material costs, save time, get results and improve business efficiency today by discovering SupplyFrame (http://supplyframe.com/parts_components_sourcing.shtml).

About SupplyFrame -- Search Engine for Electronic Components

SupplyFrame gives buyers and engineers a competitive edge with easy access to clear information about millions of electronic components. SupplyFrame delivers information and tools to people who rely on up-to-date pricing, availability, crosses, and trends. This information, along with easy, powerful tools to quote, analyze and communicate with partners is available through SupplyFrame at www.supplyframe.com.
